PROFILE

Final-year Computer Engineering student working on cyber security, AI-assisted applications and Linux systems. Completed a six-month Red Team internship in authorized web security testing and vulnerability analysis, and two enterprise IT internships covering on-site infrastructure and an Active Directory-integrated operations tool. Ships open-source applications end to end; two are packaged on the AUR.

EXPERIENCE

PTT KULE A.Ş. · IT Intern — Aug 2026 – Sep 2026
Çamlıca Tower, İstanbul · On-site

- Troubleshot physical and software faults across the large-scale IT infrastructure of Çamlıca Tower.
- Set up and diagnosed camera-to-switch connections for VLAN/PoE IP cameras; resolved cabling and device connectivity issues.
- Resolved a static IP conflict by moving devices to DHCP; rebuilt a working machine from the healthy parts of two faulty PCs.

İşbir Sentetik Dokuma Sanayi A.Ş. · IT Intern — Jul 2026 – Aug 2026
Balıkesir · On-site

- Built PrintHub, an Active Directory-integrated printer and toner management tool (Electron, Express, SQLite).
- Implemented SNMP v2c/v3 printer discovery and consumable tracking, LDAP access, role-based permissions and audit logs.
- Supported inventory, cost and reporting workflows oriented toward ISO/IEC 27001 requirements.

EMA Security LTD · Cyber Security Intern (Red Team) — Oct 2025 – Mar 2026
Remote · 6 months

- Performed authorized web security testing, vulnerability analysis and hands-on OWASP Top 10 work.
- Validated and documented findings and communicated technical security observations in clear reports.

SELECTED PROJECTS

Omarchy Focus · Python, Textual, QML, SQLite — Pomodoro timer, task queue and reversible /etc/hosts site blocker; native bar widget, TUI and CLI. Packaged on the AUR.

Lexis · Python, PyQt6, Gemini, SQLite — Local-first dictionary and language-learning app with optional Gemini assistance and SM-2 spaced repetition. AUR: lexis-git.

Notion Dictionary Automation · Python, Gemini API, ActivePieces — Requests structured JSON (definition, example) from Gemini and delivers it to Notion through a webhook.

RV32I Assembler & Linker · C, Flask — Assembler and linker with object files, symbol resolution, relocations and PicoRV32 memory output.

EDUCATION

Sakarya University of Applied Sciences · B.Sc. in Computer Engineering (4th year) — Oct 2023 – Jun 2027 (Expected)

Türkiye Siber Vatan Program 2026 · Applied cyber security training · Certificate of Participation — Dec 2025 – Mar 2026
Network and web security, vulnerability analysis, CTF-oriented exercises.

TECHNICAL SKILLS

Security	OWASP Top 10, web application testing, vulnerability assessment and reporting · Burp Suite, Nmap, FFUF, Wireshark, Metasploit
AI	LLM API integration (Gemini), structured JSON outputs, webhook automation (ActivePieces)
Linux & Networking	Arch Linux, Bash, TCP/IP, VLAN, PoE, DNS/DHCP, SNMP, LDAP/Active Directory
Development	Python (PyQt6, Textual, Flask), JavaScript (Electron, Express), SQLite, C, Java/Android, Git
Languages	Turkish (native), English (B2)

CERTIFICATIONS & ACHIEVEMENTS

TEKNOFEST 2024 Robolig Competition (University level) — Finalist · Team AllSpark · interface design — Oct 2024

CWSE — Certified Web Security Expert · Hackviser · HV-CWSE-ZNKC7QAY — Feb 2026

CAPT — Certified Associate Penetration Tester · Hackviser · HV-CAPT-2U0W5XSE — Oct 2025

Networking Basics · Cisco Networking Academy — Aug 2025
